

Actual maximum wall distance / D

Initial y+ indicator; NOT qualification

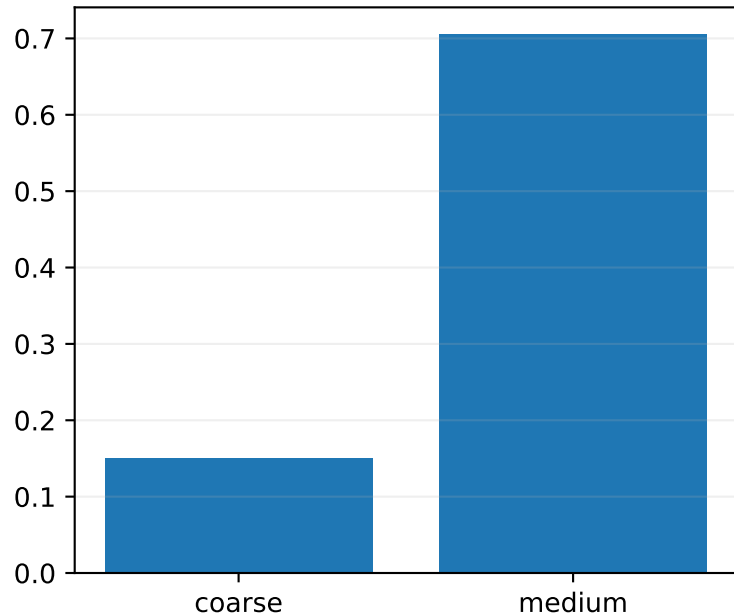

Initial explicit diffusion dt ceiling

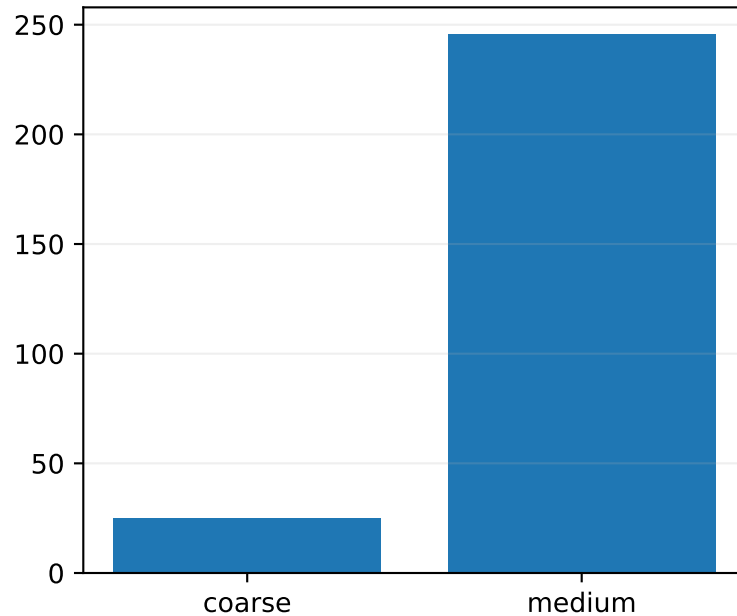

Startup costs under concurrent CPU load; not isolated scaling

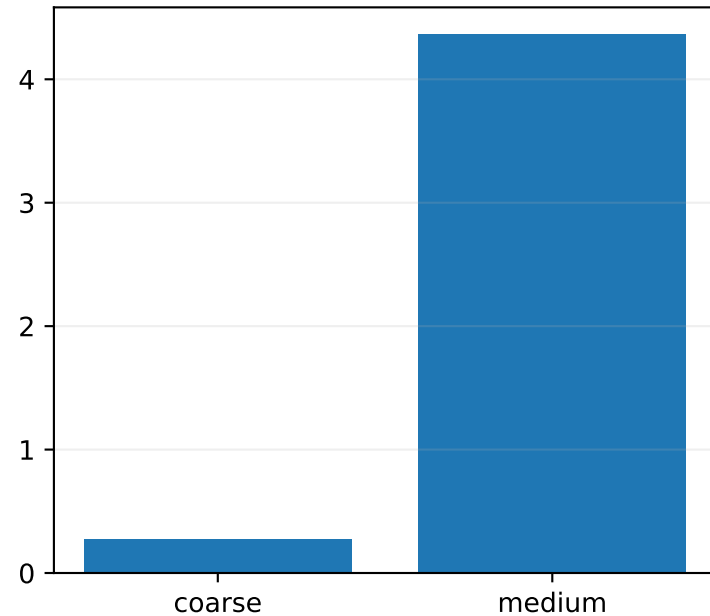

Observed seconds / step

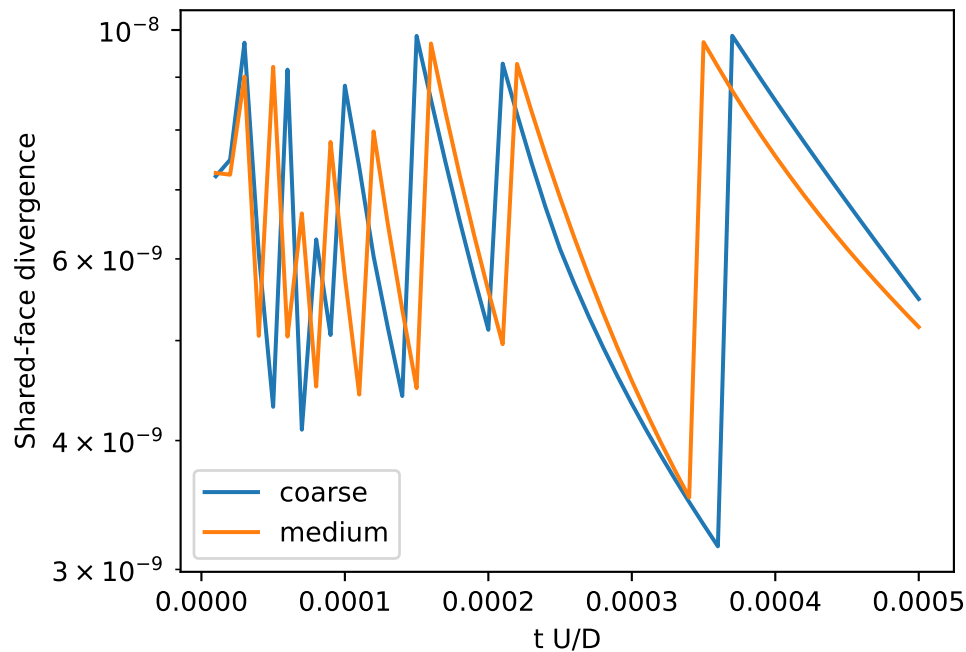

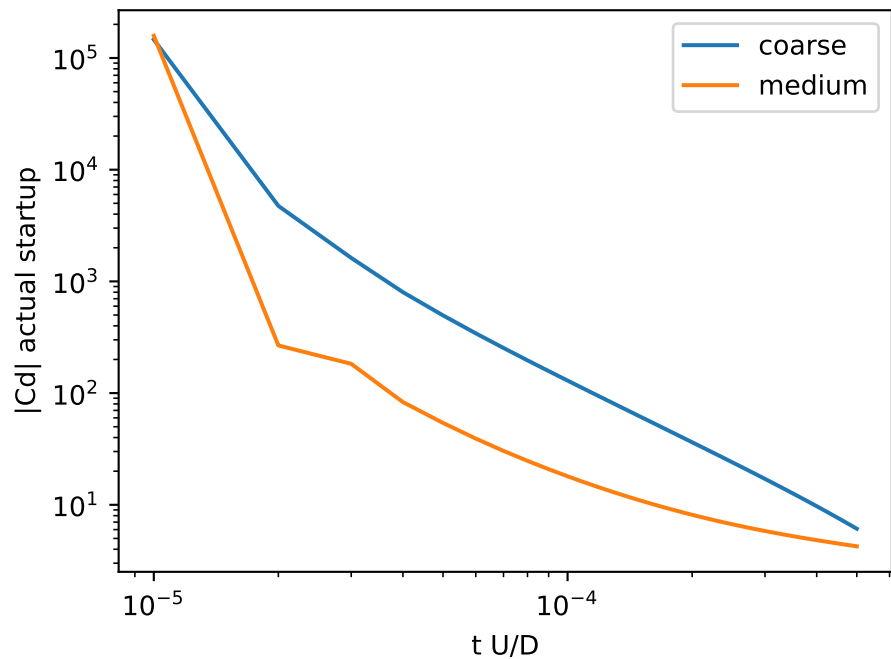

Actual pressure LU factor storage / MB

Mesh/operator/LU setup seconds

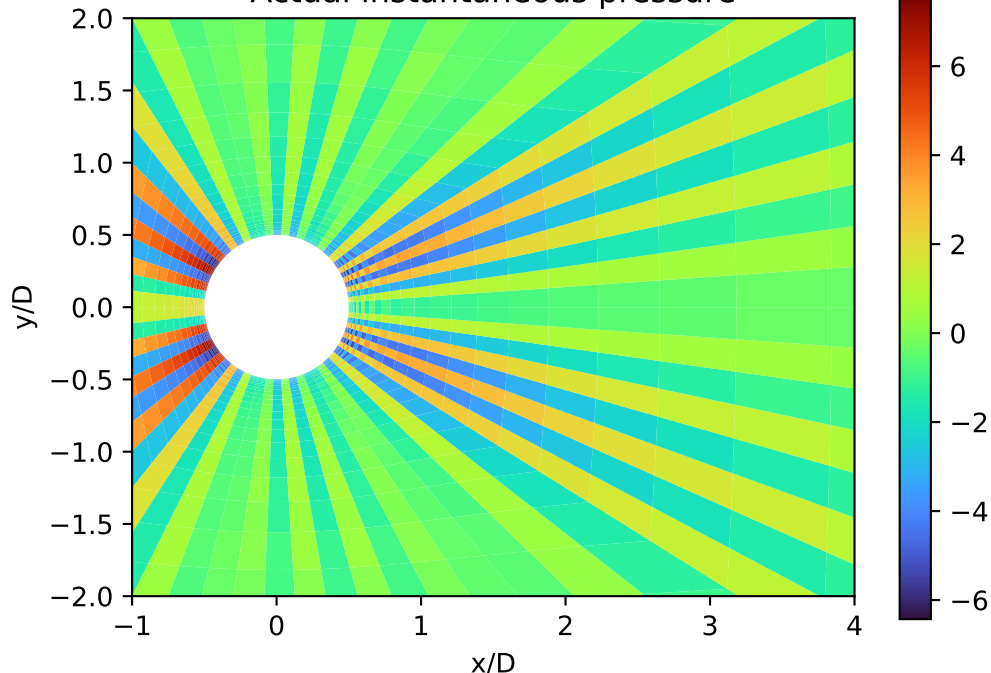

Matched 50-step startup at $dt=1e-5$: NOT converged

24576 body-fitted CV, $t^*=0.0005$: startup only

Actual instantaneous pressure

Actual instantaneous speed
